EDUCATION

C.V. Raman Global University

B.Tech (Computer Science and Engineering) — CGPA: 8.19/10

Bhubaneswar, Odisha

Aug 2023 – Jun 2027

TECHNICAL SKILLS

Languages: C/C++, Java, Python, SQL

Frameworks & Tools: Spring Boot, Spring Data JPA, FastAPI, Flask, Capacitor, React, Git

AI/ML: Machine Learning, Natural Language Processing(NLP), Pandas, Scikit-learn

CS Fundamentals: Data Structures & Algorithms, Operating Systems, OOP, DBMS, Computer Networks

Development Environment: Linux, VS Code, IntelliJ IDEA, PyCharm, Eclipse, Google Colab

CERTIFICATES

AWS Educate - Introduction to Cloud 101

Coursera - Google IT Automation with Python

Cisco Networking Academy - Introduction to Cybersecurity

Cisco Networking Academy - Introduction to Modern AI

OpenAI - Agents and Workflows

Cognizant SkillSpring - Fundamentals of Generative AI

Cognizant SkillSpring - Prompt Engineering Foundation

PROJECTS

FlashGen | *AI Assistant, Java + Spring Boot, Maven, React*

Aug 2025

- Developed an AI-powered application that converts lengthy study notes into flashcards by automatically extracting key concepts and generating question-and-answer pairs.
- Built the application using Java Spring Boot, React, and REST APIs, and designed an intuitive interface that allows users to edit, save, and organize flashcards by subject.

WatchGPT - AI Movie Companion | *Python, FastAPI, scikit-learn, Pandas*

Jan 2026

- Built a movie recommendation engine using content-based filtering (TF-IDF and cosine similarity) and collaborative filtering techniques to generate personalized recommendations.
- Developed an aspect-based conversational chatbot with dynamic sentiment-aware scoring and engineered a live caching and automated retraining pipeline using the TMDB API and scikit-learn.

Data Driven Flood Prediction | *Python, scikit-learn, NumPy, Pandas, SciPy, Matplotlib*

June 2026

- Engineered a temporal pipeline using 50 years of meteorological data, creating rainfall and discharge lag features, rolling-window statistics, and seasonal indicators.
- Implemented Particle Swarm Optimization (PSO) to optimize Support Vector Regression (SVR) hyperparameters and compared the model with BPNN and Random Forest, achieving an R^2 /NSE score of 0.9961 using BPNN with robust scaling and winsorized outlier treatment.

EXTRACURRICULAR & ACHIEVEMENTS

Coding Club - Active member of the Competitive Coding Club, actively participating in coding competitions and technical workshops within a community of 500+ students.

National Service Scheme (NSS) - Active NSS member contributing to community service initiatives and social awareness programs while fostering teamwork, leadership, and social responsibility.

GirlScript Summer of Code (GSSOC) Contributor - Contributed to open-source projects through GSSOC, enhancing project features while gaining experience in GitHub workflows, collaboration, and real-world software development practices.

LeetCode - Rating: 1471; best weekly contest rank: 4,804.
